CYBONET ANNOUNCES PARTNERSHIP WITH COMPULAB IN PANAMA

Haifa, Israel—18 January 2017: CYBONET has signed a distribution agreement with Compulab; a leading Security Solutions Provider in Panama. Compulab was founded in 1993 and is a leader in providing technology services and solutions to the Panamanian market, ensuring customer satisfaction through innovative products and superior customer service.

As a result of this new partnership agreement, CYBONET and Compulab will work together to enhance the availability of security offerings in the region. About the new agreement, David Feldman, CYBONET CEO, said: “I am excited to have Compulab represent us as a partner in the region. Their breadth of experience in providing comprehensive security solutions across multiple verticals makes this partnership a valuable addition to the CYBONET team.”

The distribution agreement will allow Compulab to immediately begin providing CYBONET’s PineApp Mail Secure solution; a comprehensive email security solution with easy-to-deploy solution modules. Additionally, it will provide the local market with access to the CYBONET Outbound Spam Guard, neutralizing botnet activity within a Service Provider’s network, and the new Cybowall solution, due for release in Q1 2017. Cybowall is an Endpoint Detection and Response solution that provides total network visibility and enables administrators to quickly address breaches across all endpoints and protocols.

ABOUT CYBONET

CYBONET, formerly known as PineApp, was originally established as an Email Security Solutions Company. Since 2002 CYBONET’s internet security and network control products enable SMB/Es and Telcos to comprehensively protect their critical network infrastructure. Whether through the flagship PineApp Mail Secure solution or the next generation of Cyber Protection solutions, CYBONET is dedicated to security.
