CYBONET

Press Release

CYBONET AND SINTEL TO PARTNER IN TURKEY

Haifa, Israel—16 January 2017: CYBONET is pleased to announce that it has signed a partnership agreement with Sintel in Turkey. Sintel operates throughout the Mediterranean basin and is an expert in the convergence of communications and in the optimization, management and security of networks. A major player in Telecoms and Security, Sintel has been active for over 25 years and adds value through its market knowledge and technical and sales expertise.

This distribution agreement will enable CYBONET and Sintel to better meet local customer needs by offering a greater range of IT security solutions. Richard Andreelli, General Manager Middle East and Africa at Sintel, states: "We are excited to partner with CYBONET and work together to provide optimal solutions to the market. Sintel is constantly on the lookout for new products and services to meet our customers' needs, and this partnership allows us to supply CYBONET's complete range of cyber security solutions to our customer base."

As a result of this partnership, Sintel adds CYBONET's flagship comprehensive messaging security solution, PineApp Mail Secure, to its product range. This year will also see the launch of CYBONET's Cybowall; our new endpoint detection and response solution. This provides total network visibility and enables administrators to quickly detect and respond to security breaches across all endpoints and protocols.

ABOUT CYBONET

CYBONET, formerly known as PineApp, was originally established as an Email Security Solutions Company. Since 2002 CYBONET's internet security and network control products enable SMB/Es and Telcos to comprehensively protect their critical network infrastructure. Whether through the flagship PineApp Mail Secure solution or the next generation of Cyber Protection solutions, CYBONET is dedicated to security.
